INVESTMENT AND VACATION IN THE MOST BEAUTIFUL PLACES IN CROATIA

In our new development projects on the Adriatic Sea, exclusive apartments are built according to the "buy-to-let" concept. For you as an investor this means on the one hand to buy a property as an investment for the purpose of renting it out and on the other hand to spend your summer vacation in your own home at one of the most beautiful vacation destinations in Croatia. You will not only profit from the long-term increase in value of the property, you also earn in the short term by renting out your apartment to guests. Of course, if you wish, you can also enjoy your apartment/flat alone for yourself without renting it out to guests. In this case, you benefit from the increase in value of your own property and thus make a sustainable investment in your future.

Object description

The 5-star property called **GOLDEN MARINA ******* is located in Punat on the island of Krk.

Four apartments of 53 m² each and a penthouse apartment of 113 m² including a terrace and a communal pool will be built. The two apartments on the first floor are barrier-free.

The existing property will be modernized in the course of a general renovation. With spacious terraces, a communal garden area, a heated pool as well as breathtaking views, it is the epitome of the pure desire for vacation.

In addition to oak parquet flooring, large tiles, electric venetian blinds, air-conditioned rooms and underfloor heating, the apartments convince with a well-thought-out floor plan, which offers a comfortable layout. In addition, each apartment is assigned a parking space.

On request, the apartment can be sold fully furnished.

Competence and philosophy

High quality in prime locations combined with customer satisfaction is our concept for success. The basis for every project is a careful selection of land and planning that has been thought through down to the last detail, so that a long-term increase in value is guaranteed. 150 realized residential units provide us with the necessary know-how and a wealth of experience for our further projects.

In all our projects, customer satisfaction and high quality are most important to us, so the use of the best materials as well as precise workmanship are a matter of course. Already during the purchase of the land and during the project development we attached great importance to the professional competence of all persons involved in the construction project.

Another important point for us is that our future owners can identify themselves with their investment, that they enjoy their apartment and furthermore that they get to know the great hospitality of the local people - whether landlord or seller.
